## INTRODUCTION

The North Dakota Uniform Crime Reporting (UCR) program involves the collection, compilation, and analysis of crime and arrest statistics reported by the various local law enforcement agencies throughout the state. Forty-seven sheriffs' departments and 35 police departments reported to the UCR program in 2007.

Law enforcement agencies may report UCR data in two ways:

**INCIDENT-BASED REPORTING:** Law enforcement agencies use a standard incident form to collect data on each incident reported to their respective agencies. This form collects much more detailed information than is collected using summary reporting. Data collected includes: type of incident, where and when the incident took place, victim characteristics, suspect/arrestee characteristics, property involved in the incident, etc. A total of 79 police departments and sheriffs' departments reported incident data for all or part of 2007.

In order to continue the statistical time-series begun with summary reporting, computer programs were written to extract summary data from the incident data reported. Crime in North Dakota, 2007 is a report on summary data.

**SUMMARY REPORTING:** Law enforcement agencies use a tally system to report the number of crime index offenses and arrests for each month. Three law enforcement agencies reported summary data in 2007.

The federal counterpart of the North Dakota UCR program is the National UCR program under the direction of the Federal Bureau of Investigation (FBI). The UCR program has been used nationally and in North Dakota for many years to measure the extent, distribution and fluctuation of crime through the crime index. The crime index is not an absolute measure, but rather an indication of the amount and type of crime occurring in any given jurisdiction. The index is composed of seven crimes that are sub-classified as follows:

**VIOLENT CRIME:** Murder/Non-Negligent Manslaughter  
Forcible Rape  
Robbery  
Aggravated Assault

**PROPERTY CRIME:** Burglary  
Larceny/Theft  
Motor Vehicle Theft

A Modified Crime Index is also calculated at the federal level. This includes arson as the fourth property crime and the eighth index offense. Data on arson is not included in this report.

Prior to an offense becoming recorded in the UCR program, it must be reported to the local law enforcement officials and reported by the local agency to the UCR program. Consequently, the UCR program only reflects reported crimes. Reporting of crimes depends on several factors,

including actual perception of an act as a crime, the probability of loss of status for reporting (as in cases of rape), and the perceived probability of action on the part of the law enforcement agency contacted.

Several types of data are gathered, including:

### **Offense data**

- Number of known crime index offenses
- Type and value of stolen property
- Additional information on homicides and arson
- Law enforcement officers killed or assaulted

### **Arrest and Clearance Data**

- Number and type of offenses cleared
- Number and type of index offenses involving juveniles cleared
- Number of persons arrested, by offense
- Characteristics of persons arrested (age, sex, race)

To allow for comparison among several geographic or jurisdictional areas with differing populations or to allow comparisons across time in an area undergoing population fluctuations, the UCR program provides for the calculation of crime rates to remove any potential biases created by population differences. Because a rate relates the incidence of activity to population, it is possible to measure annual fluctuations in criminal activity by comparing rates of crime reported in any given year with those reported in other years. National publications report crime rates calculated based on the number of reported offenses per 100,000 population. This publication provides crime rate information calculated in the same manner.

## NORTH DAKOTA CRIME SUMMARY, 2007

In 2007, 12,531 crime index offenses were reported by local law enforcement agencies. This is a decrease of 4.3 percent from the total of 13,099 reported in 2006.

Crime index offenses include: murder/non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny/theft, and motor vehicle theft.

The Census Bureau estimate of North Dakota's population for 2007 is 640,000. The index crime rate per 100,000 population for 2007 was 1958.0. The index crime rate for 2006 was 2059.6 per 100,000 population. This is a 4.9 percent decrease in the crime rate.

The total number of reported violent index crimes (murder, rape, robbery, and aggravated assault) was 885. This represents an increase of 9.5 percent from the total of 808 reported in 2006. In 2005, 690 violent index crimes were reported.

Violent crime accounted for 7.1 percent of total index crimes reported in 2007.

Collectively, property crimes (burglary, larceny/theft and motor vehicle theft) decreased by 5.2 percent from 12,291 reported in 2006 to 11,646 reported in 2007.

Property crime accounted for 92.9 percent of total crime index offenses reported in 2007.

The 8,672 larceny/theft offenses reported in 2007 accounted for 69.2 percent of total index crimes.

More than \$10.7 million worth of property was reported stolen in 2007, with 36.9 percent of that amount reported as recovered by law enforcement officials.

North Dakota law enforcement agencies reported 30,780 arrests in 2007. A total of 32,343 arrests was reported in 2006.

In 2007, juvenile arrests accounted for 21.7 percent of the total arrests. Juvenile arrests were 40.4 percent of the total arrests of crime index offenses.

The number of reported arrests in 2007 for DUI decreased to 6,085 from 6,488 reported in 2006.

Arrests for drug offenses increased 3.0 percent from a 2006 total of 2,256 to 2,323 in 2007.

# Crime Index Offenses

---

Crime index offenses include the violent crimes of murder/non-negligent manslaughter, forcible rape, robbery, and aggravated assault, and the property crimes of burglary, larceny/theft, and motor vehicle theft.

In 2007, 12,531 crime index offenses were reported by local law enforcement agencies. This is a decrease of 4.3 percent from the total of 13,099 reported in 2006.

The Census Bureau estimate of North Dakota's population for 2007 is 640,000. Based on that total, the index crime rate per 100,000 population for 2007 was 1958.0, as compared to 2059.6 for 2006. See the crime index offense summary on page 5 for crime rate information for the period 1998-2007.

More than 22 percent of crime index offenses were reported as cleared by arrest or exceptional means. The UCR program defines an offense as "cleared" by law enforcement when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. Several crimes may be cleared by the arrest of one person, while the arrests of many persons may clear only one offense. Law enforcement agencies may clear a crime by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. Examples of circumstances that allow such clearances are the death of the offender (suicide, justifiably killed by police or private citizen, etc.); the victim's refusal to cooperate with prosecution after the offender has been identified; or the denial of extradition.

In 2007, 2,700 arrests were reported for crime index offenses. Of that total, 40.4 percent were arrests of juveniles.

More than \$10.7 million worth of property was reported stolen in 2007, with 36.9 percent of that amount reported as recovered by law enforcement officials.

# Violent Crime

---

Violent crime includes the offenses of murder/non-negligent manslaughter, forcible rape, robbery, and aggravated assault. (See the UCR offense definitions section beginning on page 57 of this publication for definitions of these and other offenses.)

In 2007, 885 violent crimes were reported in North Dakota. This is a 9.5 percent increase from the 2006 total of 808 violent offenses reported. In 2005, 690 violent crimes were reported.

Violent crime comprised 7.1 percent of reported crime index offenses in North Dakota in 2007.

The violent crime rate for 2007 is 138.3 per 100,000, as compared to 127.0 per 100,000 in 2006. This is an 8.9 percent increase in the violent crime rate. In 2005, the violent crime rate was 108.3 per 100,000 population.

Approximately 44 percent of violent crimes in 2007 were reported as cleared by arrest or exceptional means.

Of the 312 total arrests reported for violent crimes, 14.7 percent were arrests of juveniles.

# Murder/Non-Negligent Manslaughter

The UCR program defines Murder/Non-Negligent Manslaughter as the “willful killing of one human being by another.” Not included in this category are attempts to murder, assaults to murder, suicides, accidental deaths, justifiable homicides, and deaths caused by gross negligence.

Sixteen murder/non-negligent manslaughter deaths were known to the North Dakota UCR program in 2007.

Twelve of the sixteen victims were adults. “Adult” is defined as a person aged 18 years or older.

Six of the victims were male.

Firearms were involved in the deaths of four homicide victims. In 3 homicides, the weapon involved was asphyxiation. (See the summary of homicide incidents and the weapons involved on page 10.)

The Office of Attorney General publishes a detailed report titled Homicide in North Dakota. The report provides an analysis of homicides for the period 1988-2007 and is available on our website at [www.ag.nd.gov](http://www.ag.nd.gov), under the News and Publications link.

## Forcible Rape

---

The UCR program defines Forcible Rape as “the carnal knowledge of a female forcibly and against her will.” Assaults to rape, attempts to commit rape by force or threat of force are included. Carnal abuse, statutory offenses (no force -- victim under age of consent), and other sex offenses are not included.

In 2007, 202 forcible rapes were reported to local law enforcement in North Dakota. This is an increase of 3.6 percent from the 2006 total of 195 offenses. A total of 179 forcible rapes was reported in 2005.

Because the UCR definition states that victims of rape must be female, the rate of occurrence for reported rapes is calculated based only on the female population. The Census Bureau estimate of North Dakota’s population for 2007 is 640,000. The number of females is approximately half of that figure. The resulting rate for 2007 is 63.1 reported rapes per 100,000 females, compared with 61.3 rapes per 100,000 females in 2006. In 2005, the forcible rape rate was 56.2 per 100,000 females.

In 2007, 28.7 percent of reported rapes were cleared by arrest or exceptional means.

Thirty-seven arrests for forcible rape were reported in 2007. Approximately 78 percent of those arrested were adults. In 2006, 45 arrests for rape were reported.

# Crime Index Offenses by Reporting Jurisdiction

The rate per 100,000 population is shown immediately below the actual number of crime index offenses reported by each jurisdiction. A county total is also shown for each of those counties that have more than one reporting jurisdiction within its geographic boundaries. The rate is reported per 100,000 for easy comparison to national publications.

# ARREST ANALYSIS

---

# Arrests in 2007

---

Although primarily an indication of law enforcement activity, the number of arrests reported does provide a limited profile of the perpetrators of crime, especially for those crimes that have high clearance rates. Differing arrest practices, policies, and enforcement emphases among agencies influence the volume of arrests for various offenses, particularly those against public order such as vagrancy, disorderly conduct, and related violations. However, arrests for serious crimes, e.g., robbery or burglary, are more likely to be uniform throughout all jurisdictions across the state.

The UCR program requires that an arrest be counted for each separate occasion an individual is taken into custody. Although several charges may be lodged against a person at the time of the arrest, only one arrest is counted for each time the person is taken into custody.

North Dakota law enforcement agencies reported 30,780 arrests in 2007. A total of 32,343 arrests was reported in 2006.

In 2007, more than 21 percent of total arrests were arrests of juveniles.

Seventy-one percent of the total was arrests of males.

Arrests for the crime index offenses of murder/non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny/theft and motor vehicle theft comprised 8.8 percent of the total reported arrests. Of the 2,700 reported arrests for crime index offenses, 40.4 percent were arrests of juveniles.

The total of 12,203 reported arrests for DUI and liquor law violations represents 39.7 percent of the total arrests reported in the state of North Dakota in 2007. Arrests for DUI decreased from 6,488 in 2006 to 6,085 in 2007. Liquor law violation arrests decreased 6.1 percent from 6,513 in 2006 to 6,118 reported in 2007.

More than 79 percent of total arrests were white; over 16 percent were Native American.

These statistics are provided by local law enforcement agencies that contribute to the North Dakota UCR program. No arrest figures for reservations in the state are included in these totals. Tribal law enforcement agencies do not participate in the state UCR program.

Juveniles (persons under the age of 18) comprised 12.0 percent of the total in 2007.

Nearly 89 percent of the drug arrests during the 10-year period were arrests for possession rather than sale or manufacture of drugs.

Approximately 72 percent of the arrests for drug offenses during the period 1998-2007 involved marijuana.

# DUI Arrest Analysis

---

Reported DUI arrests decreased 6.2 percent from 6,488 in 2006 to 6,085 in 2007. The arrest totals should not be interpreted as the number of individuals arrested for DUI offenses because it is possible that some individuals may have been arrested on more than one occasion.

Nearly 76 percent of the DUI arrests in 2007 were arrests of males.

Juveniles, persons under the age of 18, made up 1.1 percent of the total in 2007.

# UNIFORM CRIME REPORTING OFFENSE DEFINITIONS

Offenses in Uniform Crime Reporting are divided into two groups designated as Part I and Part II crimes. Information on the number of Part I offenses known to law enforcement, the number cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Arrest data are reported for Part I and Part II offenses. The Crime Index is composed of offenses 1-7 with the exception as noted in item 1 below.

NOTE: The classifications of these offenses for UCR reporting purposes are based on law enforcement investigation as opposed to determination by a court, medical examiner, jury, or other judicial hearing.

## **PART I OFFENSES:**

### **1. CRIMINAL HOMICIDE**

#### **a. Murder and Non-Negligent Manslaughter**

The willful (non-negligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty, and (2) the killing of a felon by a private citizen.

#### **b. Manslaughter by Negligence**

The killing of another person through gross negligence. Excludes traffic fatalities. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.
